

# Contents

## Invited Papers

|  |   |
|--|---|
| An Implementation of a Coarse-Fine Mesh Stabilized Schwarz Method<br>for a Three-Space Dimensional PDE-Problem ..... | 3 |
| <i>Owe Axelsson, Roman Kohut, and Maya Neytcheva</i>   |   |

|   |    |
|---|----|
| Mixed Finite Element Methods for the Navier–Stokes–Biot Model ..... | 19 |
| <i>Sergio Caucao, Aashi Dalal, Tongtong Li, and Ivan Yotov</i>      |    |

## Preconditioning and Multilevel Methods

|  |    |
|--|----|
| Robust Iterative Solvers for Algebraic Systems Arising from Elliptic<br>Optimal Control Problems ..... | 35 |
| <i>Ulrich Langer, Richard Löscher, Olaf Steinbach, and Huidong Yang</i>                                |    |

|  |    |
|--|----|
| Numerical Comparison of Block Preconditioners for Poroelasticity ..... | 44 |
| <i>Tomáš Lubér</i>   |    |

|  |    |
|--|----|
| Two-Dimensional Semi-linear Riesz Space Fractional Diffusion Equations<br>in Convex Domains: GLT Spectral Analysis and Multigrid Solvers ..... | 52 |
| <i>Stefano Serra-Capizzano, Rosita L. Sormani, and Cristina Tablino-Possio</i>   |    |

|   |    |
|---|----|
| Continuation Newton Methods with Applications to Plasticity ..... | 61 |
| <i>Stanislav Sysala</i>   |    |

## Fractures and Mixed Dimensional Modeling: Discretizations, Solvers, and Methodology

|  |    |
|--|----|
| Mixed and Nitsche’s Discretizations of Frictional Contact-Mechanics<br>in Fractured Porous Media ..... | 71 |
| <i>L. Beau de, F. Chouly, M. Laaziri, and R. Masson</i>  |    |

## Machine Learning and Model Order Reduction for Large Scale Predictive Simulations

|  |    |
|--|----|
| Towards Efficient SOT-Assisted STT-MRAM Cell Switching Using<br>Reinforcement Learning ..... | 83 |
| <i>Johannes Ender, Roberto Lacerda de Orio, Wolfgang Gös,<br/>and Viktor Sverdlov</i>        |    |

|  |     |
|--|-----|
| Machine Learning Algorithms for Parameter Identification for Reactive Flow in Porous Media .....   | 91  |
| <i>Daria Fokina, Vasily V. Grigoriev, Oleg Iliev, and Ivan Oseledets</i>   |     |
| Randomized Symplectic Model Order Reduction for Hamiltonian Systems .....  | 99  |
| <i>R. Herkert, P. Buchfink, B. Haasdonk, J. Rettberg, and J. Fehr</i>  |     |
| Adaptive Localized Reduced Basis Methods for Large Scale PDE-Constrained Optimization .....  | 108 |
| <i>Tim Keil, Mario Ohlberger, and Felix Schindler</i>  |     |
| Application of Deep Kernel Models for Certified and Adaptive RB-ML-ROM Surrogate Modeling .....  | 117 |
| <i>Tizian Wenzel, Bernard Haasdonk, Hendrik Kleikamp, Mario Ohlberger, and Felix Schindler</i>   |     |
| <b>Fractional Differential Problems: Theoretical Aspects, Algorithms and Applications</b>  |     |
| Parametric Analysis of Space-Time Fractional Pennes Bioheat Model Using a Collocation Method Based on Radial Basis Functions and Chebyshev Polynomials ..... | 129 |
| <i>Hitesh Bansu and Svetozar Margenov</i>  |     |
| Numerical Determination of Source from Point Observation in a Time-Fractional Boundary-Value Problem on Disjoint Intervals .....                             | 137 |
| <i>Miglena N. Koleva and Lubin G. Vulkov</i>   |     |
| The Wright Function – Numerical Approximation and Hypergeometric Representation .....  | 146 |
| <i>Dimitar Prodanov</i>  |     |
| Study of Sparsification Schemes for the FEM Stiffness Matrix of Fractional Diffusion Problems .....  | 154 |
| <i>Dimitar Slavchev and Svetozar Margenov</i>  |     |
| Fractional Diffusion Problems with Reflecting Boundaries .....   | 164 |
| <i>Ercília Sousa</i>   |     |
| <b>Variational Analysis and Optimal Control</b>  |     |
| A Mean Field Model for Counter CBRN Threats .....  | 175 |
| <i>Rossana Capuani and Antonio Marigonda</i>   |     |

A Sufficient Condition for a Discrete-Time Optimal Control Problem ..... 184  
*Mikhail I. Krastanov and Boyan K. Stefanov*

**Stochastic Optimal Control and Numerical Methods in Economics and Finance**

Computation of the Unknown Time-Dependent Volatility of American Options from Integral Observations ..... 195  
*Slavi Georgiev and Lubin Vulkov*

**Tensor Methods for Big Data Analytics and Low-Rank Approximations of PDEs Solutions**

Efficient Solution of Stochastic Galerkin Matrix Equations via Reduced Basis and Tensor Train Approximation ..... 205  
*Michal Béréš*

The Tensor-Train Mimetic Finite Difference Method for Three-Dimensional Maxwell’s Wave Propagation Equations ..... 215  
*Gianmarco Manzini, Boian Alexandrov, Phan Minh Duc Truong, and Radoslav G. Vuchkov*

A Functional Tensor Train Library in RUST for Numerical Integration and Resolution of Partial Differential Equations ..... 223  
*Massimiliano Martinelli and Gianmarco Manzini*

**Applications of Metaheuristics to Large-Scale Problems**

Solving the Mountain Car Problem Using Genetic Algorithms ..... 237  
*Amelia Bădică, Costin Bădică, Ion Buligiu, Liviu Ion Ciora, Maria Ganzha, and Marcin Paprzycki*

Ant Algorithm with Local Search Procedure for Multiple Knapsack Problem ..... 246  
*Stefka Fidanova and Krassimir Atanassov*

Variable Neighborhood Search in Hamming Space ..... 253  
*S. B. Hengeveld and A. Mucherino*

An Improved Algorithm for Fredholm Integral Equations ..... 262  
*Venelin Todorov, Slavi Georgiev, Stoyan Apostolov, and Ivan Dimov*

|   |     |
|---|-----|
| Optimization of the Standard Lattice Sequence for Multidimensional Integrals Regarding Large-Scale Finance Problems .....                                       | 271 |
| <i>Venelin Todorov, Slavi Georgiev, Borislav Chakarov, and Svetoslav Hadzhiivanov</i>   |     |
| Circular Intuitionistic Fuzzy Knapsack Problem .....  | 279 |
| <i>Velichka Traneva, Petar Petrov, and Stoyan Tranev</i>  |     |
| <b>Large-Scale Models: Numerical Methods, Parallel Computations and Applications</b>  |     |
| Clouds Formed by Thermals Arising and Evolving Under the Influence of the Coriolis Force .....  | 291 |
| <i>Hristo Chervenkov and Valery Spiridonov</i>  |     |
| A Nonstandard Finite Difference Method for a General Epidemic Model .....   | 299 |
| <i>István Faragó, Gabriella Svantnérné Sebestyén, and Bálint Máté Takács</i>  |     |
| Minimization of Energy Functionals via FEM: Implementation of hp-FEM .....  | 307 |
| <i>Miroslav Frost, Alexej Moskovka, and Jan Valdman</i>   |     |
| Influence of the Grid Resolutions on the Computer Simulated Transport and Transformation Atmospheric Composition Processes over the Territory of Bulgaria ..... | 316 |
| <i>Georgi Gadzhev, Ivelina Georgieva, Kostadin Ganev, Vladimir Ivanov, and Nikolay Miloshev</i>   |     |
| Development of New High Performance Computer Architectures and Improvements in Danish Eulerian Model for Long Range Transport of Air Pollutants .....           | 325 |
| <i>Krassimir Georgiev, Zahari Zlatev, and Ivan Lirkov</i>   |     |
| Evaluation of the Effects of the National Emission Reduction Strategies for Years 2020–2029 and After 2030 on the AQI on the Territory of Bulgaria ...          | 335 |
| <i>Ivelina Georgieva, Georgi Gadzhev, Kostadin Ganev, Vladimir Ivanov, and Nikolay Miloshev</i>   |     |
| Mathematical and Computational Modeling of a Nonlinear Elliptic Problem in Divergence Form .....  | 343 |
| <i>Sergey Korotov and Michal Křížek</i>   |     |
| Two Approaches for Identifying Epidemiological Parameters Illustrated with COVID-19 Data for Bulgaria .....   | 354 |
| <i>Tchavdar T. Marinov, Rossitza S. Marinova, and Nicci Shelby</i>  |     |

Improved Stochastic Lattice Methods for Large-Scale Air Pollution Model . . . . 363  
*Venelin Todorov, Slavi Georgiev, Ivan Dimov, Rayna Georgieva,  
 and Tzvetan Ostromsky*

**HPC and HPDA: Algorithms and Applications**

Parallel Solution of the Schrödinger-Poisson Equation on GPUs . . . . . 375  
*Johann Cervenka, Robert Kosik, and Felipe Ribeiro*

Anastylosis of Frescos – A Web Service in an HPC Environment . . . . . 383  
*Dimo Dimov, Todor Gurov, Sofiya Ivanovska, and Svetlozar Yordanov*

A Resolvent Quasi-Monte Carlo Method for Estimating the Minimum  
 Eigenvalues Using the Error Balancing . . . . . 394  
*Silvi-Maria Gurova, Emanouil Atanassov, and Aneta Karaivanova*

Influence of the Grid Resolutions on the Computer Simulated Air Quality  
 Indices over the Territory of Bulgaria . . . . . 404  
*Vladimir Ivanov, Georgi Gadzhev, Ivelina Georgieva, Kostadin Ganev,  
 and Nikolay Miloshev*

Application of Active Subspaces for Model Reduction and Identification  
 of Design Space . . . . . 412  
*Sergei Kucherenko, Nilay Shah, and Oluyemi Zaccheus*

EOCSim: A CloudSim-Based Simulator for Earth Observation Data  
 Processing in Clouds . . . . . 419  
*Arthur Lalayan, Hrachya Astsatryan, and Gregory Giuliani*

About Methods of Vector Addition over Finite Fields Using Extended  
 Vector Registers . . . . . 427  
*Maria Pashinska-Gadzheva and Iliya Bouyukliev*

Grid Search Optimization of Novel SNN-ESN Classifier  
 on a Supercomputer Platform . . . . . 435  
*Dimitar Penkov, Petia Koprinkova-Hristova, Nikola Kasabov,  
 Simona Nedelcheva, Sofiya Ivanovska, and Svetlozar Yordanov*

Parallelisms of PG(3, 4) with a Great Number of Regular Spreads . . . . . 444  
*Svetlana Topalova and Stela Zhelezova*

**Contributed Papers**

On Some Quadratic Eigenvalue Problems ..... 455  
*Andrey B. Andreev and Milena R. Racheva*

Numerical Determination of Time-Dependent Volatility for American  
Option When the Optimal Exercise Boundary Is Known ..... 463  
*Miglena N. Koleva and Lubin G. Vulkov*

Exploring the Global Solution Space of a Simple Schrödinger-Poisson  
Problem ..... 472  
*Robert Kosik, Johann Cervenka, Dominic Waldhör, Felipe Ribeiro,  
and Hans Kosina*

**Author Index** ..... 481
