

Capitalize Major Words in Your Title

P. Author, F. Coauthor, S. Coauthor

This is the LaTeX template for an LSSC abstract. The abstract should clearly highlight the originality of the reported results. It is assumed that each participant will give no more than one presentation.

Please Capitalize the Major Words in the Title.

Please abbreviate the given name of each author. For example, list *Presenting Author* as P. Author, *First Coauthor* as F. Coauthor, *Second Coauthor* as S. Coauthor, and so on.

Please underline the name of the presenting author.

The full names, affiliations, and postal addresses of the authors may be provided after the `\end{document}` command.

Please do not include a `thebibliography` environment in your abstract. Instead, cite references manually as [1] and [2], to facilitate the compilation of the Book of Abstracts.
